

Equipment needed:

Photocopied star

1 pencil

1 mirror

Mind Boggle Star

You must read all instructions on this page before commencing.

STEP 1:

Pick up a pencil using your non-dominant hand. You will be expected to draw around the star pattern, between both lines, but there are a number of rules that you must adhere to:

1. You must NOT, at any stage, lift the pencil from the paper.
2. You must not look down at what you are doing or look at the page with the star. You need to rely on the reflection in the mirror to view everything.
3. The star has a double border around it (i.e. two lines). As you draw, you have to try and stay within these two lines.
