

## This is your guide to our acquired brain injury services for children and young people across the south of England.

Your ABI Coordinator has given you this booklet to introduce you to the services the Child Brain Injury Trust has to offer:

The Child Brain Injury Trust is a national charity working with families across the UK who are affected by childhood acquired brain injury. We support families in hospitals, schools and in the community – providing support when it is needed. All our services for families are offered without charge.

An Acquired Brain Injury (ABI) is not something that anyone plans for or sees coming. It can be a sudden and life changing situation and our team are here to help you and your family with the support and information you may need at this difficult time.

Our ABI Coordinators understand acquired brain injury and the impact it might have on the whole family. They are local to your area and have a network of support services that they can also signpost you to.

You can access our services by visiting the Advice, Information and Referrals page on our website: [childbraininjurytrust.org.uk/how-we-help/advice-information-referrals/](https://childbraininjurytrust.org.uk/how-we-help/advice-information-referrals/) or by contacting your ABI Coordinator directly.

# What services can families expect?

## Direct support for families in hospital and at home

Our ABI Coordinators are not clinicians or doctors but are experts in their field and have a wealth of knowledge and experience to enable them to help people understand childhood acquired brain injury. They are there to listen and to help explain or clarify things for you.

They offer support to you whilst your child is in hospital and can help you to understand what is going on around you and who everybody is, sort out finances and accessing appropriate benefits, taking time off from work and importantly, how to return to school in a supported way.

They can speak to other family members for you and advise you who to speak to in the hospital if you have questions. When you leave the hospital we will be with you and help with the transition when the time comes.

## Support for siblings

We can offer specific help and support for siblings and can often explain things in an age appropriate way that they can understand. We can provide resources for them to read themselves or with you.

## Goal setting and assessment of need

Although we don't offer a clinical service, we are able to assess non-clinical needs and help to put a plan in place to enable you and your family to move forward. This will involve working with you to help prioritise your needs and goals.

## Signposting

When we are not able to help directly, we often know of an organisation or team that can. Our ABI Coordinators have a great understanding of local networks where you can access additional support and they will signpost to the most appropriate organisations and help you understand what can sometimes be a minefield of information.

## Family Support Hubs

Once things are more settled, you may want to come along to one of our family support hubs where you can chat to other families going through a similar experience, or even to share your own experience and help other families. We also offer one to one support from our ABI Coordinator and sometimes have guest speakers.

## Referral Service

In some cases, we are able to refer families for additional support and further intervention from other agencies such as Social Services, Outpatients clinics or community rehab, etc.

## Support getting back to school

When your child is ready to go back to school, our ABI Coordinators will work with you and the school team to develop a 'phased return to school' schedule and make sure that the return is supportive and timely. We can help with staff awareness sessions, peer support and with Special Educational Needs support and we offer training for teachers – Understanding Childhood Acquired Brain Injury – which is without charge.

## Social opportunities

When a brain injury happens, it can be an isolating situation. From time to time we offer social activities for the whole family to participate in. These activities are an opportunity for families to forget about brain injury and to focus on having fun. Please speak to your ABI Coordinator about what events are coming up in your area that you can become involved with.

## Adolescence

We understand that teenage years and adolescence can be a tough time, so adding in possible effects from a brain injury may make things a little bit more difficult. We know and understand about this and it is another area that we can support you with. We can help with the transition through to further education and provide some helpful advice and strategies.

## Information resources

Our website is full of useful information and resources for parents and carers, as well as for children and young people to understand what's going on. Your ABI Coordinator will have some of these resources in the hospital and can bring some of them to you. You can download factsheets onto a tablet or smartphone on many different topics by checking out our website: [childbraininjurytrust.org.uk](http://childbraininjurytrust.org.uk). We can also print and send them to you on request.

We facilitate Family Support Facebook Groups. Your ABI Coordinator will invite you to join, once we have your consent and when you're ready. The groups are a great place to chat, share information and hear about news and events going on in your area. See: [facebook.com/childbraininjurytrust](https://facebook.com/childbraininjurytrust).

## E-learning

We have a large range of e-learning sessions that are completely free of charge for families and professionals. They cover topics such as returning to school, behaviour issues, sleep issues, understanding acquired brain injury, legal support and many more. You can access these via our website and can view them as many times as you wish. You can also take part in one of the live and interactive e-learning sessions we host regularly.

## Family Counselling Service

We are able to refer families to our UK wide virtual Family Counselling Service. The service is provided by independent and qualified counsellors who can provide support to:

- Parents and carers
- Children and young adults with an ABI (11 yrs and over)
- Siblings of a young person with an ABI (11 yrs and over).

Families are able to access six to eight 50-minute counselling sessions (one session per week) without charge.

Please note you must have completed a referral form to access this service.

## CBIT in Hand

CBIT in Hand is a mobile app that you can download from the App Store or Google Play. CBIT in Hand provides personalised support guides suitable for families at different stages of the rehabilitation journey. It's full of useful information and advice via your 'mobile device' and something to recommend to your friends and family.

## Legal Support Service

When a brain injury happens, we understand that the whole family is affected. We understand what you are going through and want your family to have the best support for your journey. It's really important to get independent advice from an expert legal professional who understands childhood acquired brain injury and knows how to get the very best for your child's rehabilitation. It's also important to speak to someone as soon as you feel ready to have the conversation.

If your child was injured in an accident, the sooner you can ask a solicitor to investigate matters, the quicker a good legal expert can intervene and relieve some of the pressure that you are currently going through. They can work with the team of health professionals around your child and assist with the journey.

We have created a UK network of regional, trusted partnerships to ensure that the children, young people and families that we support get the right legal support as soon as possible. This can cover a wide range of specialisms, from assisting with pursuing a claim for welfare benefits or compensation, to understanding what your employment rights are if you need to take time off work to care for your child.

Across the south of England, our legal partner is Moore Barlow Solicitors and the firm and its expert team have extensive experience and expertise. Importantly, they share our values of putting families first and listening to their needs. They have worked with the charity for many years and have represented countless families in similar circumstances to your own. They understand what you are going through and how to help you look to the future.

The members of the Child Brain Injury Trust's Legal Support Service have all made a donation to support the vital work of the charity. Further information can be found by visiting: [childbraininjurytrust.org/legalsupportservice](http://childbraininjurytrust.org/legalsupportservice).

# Meet the team

## Damian Horan

Damian is a Senior Partner and Head of Personal Injury at Moore Barlow. He is regarded as one of the UK's leading catastrophic personal injury lawyers. For over 20 years, Damian has specialised in representing clients who have sustained life changing injuries. He is passionate about the work he does and getting help and support for the children and families he represents. He enjoys meeting his clients and working as part of the team to achieve the best rehabilitation and independence possible.

Some recent quotes from other professionals and clients about Damian from the Legal 500 and Chambers UK, the leading independent guides:

“is a standout practitioner – vastly experienced, lovely manner with clients and not afraid of a fight.”

“has an outstanding track record in catastrophic injury cases; he is a go-to for individuals that have sustained severe brain injuries”.

“demonstrates meticulous attention to detail and shows genuine compassion for the welfare of his clients.”

“is praised for his “first-class customer service,” explaining that he is “completely invested in and flexible to the client’s needs.”

Commentators extol “his ability to empathise with clients and his practical knowledge of the way the law works.”

“Damian Horan is respected by peers and clients for his strong track record in representing clients with catastrophic injuries. As one source notes, “he has always made sure he’s there to talk to. He explains everything I need to know, and he’s such a nice person”.

## Case One

We acted for a young girl who aged 15 sustained a severe brain injury as a result of a road traffic accident. Despite a denial of liability by the insurers we were able to persuade them, within a week of being instructed to act, to fund the appointment of a case manager and to provide the family with an immediate interim payment to help with day to day living costs and to pay the rent as her mother needed to give up work to be at her bedside.

We subsequently secured an offer of funding to enable our client to have on-going private rehabilitation to include a placement at the specialist facility at Tadworth. We were also able to support our client's family with immigration advice to enable her father to travel from overseas. We further provided education law advice to enable necessary support to be provided to enable our client to return to school.

After securing reports from a team of specialist independent experts we were able to conclude settlement of our client's claim for a significant seven figure sum within two years of the accident date.

## **Case Two**

We recently settled a claim for a child that sustained a significant and complex traumatic brain injury whilst travelling as a passenger in a car. As part of our client's settlement we secured funds for his life-long care, equipment, transport and rehabilitation needs. He has the ongoing support of a case manager and a team of therapists to help him achieve his maximum potential and enjoy life. We were able to purchase a specially adapted property enabling him to access all areas of the home.

Our client's parents have peace of mind knowing they have the support and money needed to help make their son's life as comfortable as possible and to help make life easier for them as a family.
